ENHANCING YOUR SMART GRID NETWORK

CONSULTING SERVICES FOR FIBER-BASED BROADBAND OFFERINGS

Rural electric cooperatives operate in a complex and challenging environment. An ongoing concern is serving the needs of its members, while creating new economic opportunity and growth.

Enhancing your Smart Grid network by offering fiber-based broadband services to your members is one of the best strategies you can pursue to ensure a better quality of life and rural prosperity for years to come.

Broadband is the next evolution for electric co-ops and GVNW Consulting is well positioned to provide a blueprint, determine the best path, reduce the risk and position your company as the broadband provider of choice in your underserved market.

With over 4 decades of experience partnering with broadband providers, GVNW is one of the leading rural telecom consulting firms in the nation. Our team can bring your electric cooperative the broad expertise required to offer a cash-positive broadband solution to your members.

Our Services:

- Feasibility Studies
- Business Planning
- Background & Financial Pro Formas
- RUS Loan Preparation
- Telecom Regulatory Consulting
- Company Structure
- Marketing
- Community Outreach
- Engineering Studies

Since 1970, GVNW Consulting has been passionate about achieving better results for our clients -- helping them achieve successes for the stakeholders and communities they serve.

We'd like the opportunity to be your trusted business advisor and partner. Please give us a call to discuss your specific needs and to help determine the options for providing broadband solutions in your market.
