

Revised A-CAM Offer Released

The Wireline Competition Bureau announced the revised A-CAM offer on May 7, 2018. [Click Here](#) to view the report that lists the revised state-level offers along with the revised deployment obligations. If you recall, the FCC previously directed the Bureau to offer all current A-CAM recipients additional support up to \$146.10 per location for all locations with costs above \$52.50. Only current A-CAM recipients are eligible to elect the revised offer.

To elect the revised support amount and commit to the additional deployment obligations, carriers must submit a letter signed by an Officer of the company confirming that the carrier “elects the revised model-based support amount as specified in Report 11.0 released May 7, 2018 and commits to satisfy the specific service obligations associated with that amount of model support.” Letters must be emailed to ConnectAmerica@fcc.gov by **June 21, 2018**.

Carriers opting to not accept the revised A-CAM offer do not need to do anything further.
